

When to use Multi-Factor Authentication (MFA)?

A large blue circle with a dashed line border contains the text "On IH Network". Inside the circle, there is an icon of a laptop with "VPN" on its screen, a computer monitor displaying the "i-Site" login page, and a blue padlock icon with a red prohibition sign over it.

On IH Network

IMPORTANT NOTE:
Multi-Factor Authentication (MFA) is only needed outside of the secure IH network.

A large orange dashed circle contains the text "Outside IH Network". Inside the circle, there is a computer monitor displaying the "i-Site" login page with the Microsoft Authenticator option selected, and a smartphone displaying an approval request. A blue padlock icon with a green checkmark is shown in a speech bubble next to the smartphone.

Outside IH Network
