CORRECTED--Combined H1N1 and Seasonal Flu Clinic Info for Barriere

The information previously posted on the Interior Health website for the Barriere combined flu clinic for high-risk individuals was incorrect.

Could you please change your information to reflect the correct time:

- **Tuesday, November 3, 2009**
- **Barriere & District Senior Society Drop-in Centre**
- **2:00 – 6:00 p.m.**

In keeping with Provincial recommendations, the following priority groups will receive their H1N1 vaccinations first:

- Pregnant women in the second half of pregnancy
- Persons under age 65 with chronic conditions
- Children 6 months – 59 months of age (less than 5 years old)
- Household contacts and care providers of infants less than 6 months of age
- Household contacts and care providers of persons who are immunocompromised
- Persons residing in rural and remote communities
- Health care workers.

To Find the Clinic Nearest You

Additional clinics are being scheduled in communities throughout the Interior. Details about times, dates and locations of the clinic nearest you – where you can get both the H1N1 vaccine and a seasonal flu shot – will be posted, when available at:

- Flu Clinic Locator at www.interiorhealth.ca or www.immunizebc.ca
- HealthLink BC, dial 8-1-1, available 24 hours a day
- Your local Public Health Centre.

Both H1N1 and seasonal influenza vaccines are also available from many physicians and walk-in clinics, and in the coming weeks from some pharmacies.
