

Healthcare-Associated Infections

Cariboo Memorial Hospital

1 Apr. 2018 – 20 Sep. 2018

Our Goal: Zero healthcare-associated infections

What is healthcare-associated infection? Infection that is not present on admission to the hospital but developed during a hospital stay

What do we do to prevent healthcare-associated infections? Infection Prevention and Control, in collaboration with nursing and housekeeping staff at Cariboo Memorial Hospital, make sure routine infection prevention best practices* are used throughout the hospital.

	<i>Clostridium difficile</i> Infection (CDI)	Methicillin-resistant <i>S. aureus</i> (MRSA)
	Rate per 10,000 patient-days	Rate per 10,000 patient-days
CMH	0.0	5.2
IH	4.3	2.2
