

Dear Kindergarten Parent,

We would like to welcome your child to Kindergarten. Here is information for you about school health services provided by **public health staff**.

Communicable Diseases (illness)

Call the school or Public Health Nurse if you think your child has a disease (or illness) such as:

- whooping cough
- influenza (flu)
- pink eye

Keep sick children home to recover. Washing hands often can stop many infections from spreading. Remind your child not to share any item that may have saliva (spit) on it, such as cups and water bottles. Good resources for health information are:

- Health Link BC www.HealthLinkBC.ca/healthfiles/ and 811 to speak to a registered nurse.
- Interior Health public website <https://www.interiorhealth.ca/YourHealth/Pages/default.aspx>

Head Lice

Head lice are a bother but do not cause disease. The school may send information home on how to prevent, check for and treat head lice. You can help by checking your child's head for lice and keeping long hair tied back. For prevention and treatment information see: <http://www.interiorhealth.ca/YourHealth/SchoolHealth/HeadLice/>

Immunizations (shots)

Children 4-6 years of age should get:

- A school entry booster dose of Diphtheria, Pertussis (whooping cough), Tetanus, and Polio <https://www.healthlinkbc.ca/healthlinkbc-files/tdap-ipv-vaccine> and
- A second dose of both Chickenpox (Varicella) and Measles / Mumps / Rubella (MMR) as a combined vaccine MMRV <https://www.healthlinkbc.ca/healthlinkbc-files/mmr-vaccine>

Parents can check their child's immunization history using the online <http://www.immunizebc.ca/vaccination-status-indicator>. Vaccination Status Indicator tool to see if their child's immunization records are on file with Public Health and if their child is up to date on immunizations. Follow the prompts on the site to learn about your child's vaccine status with the provincial registry. Parents may contact their local public health centre to ask if their children are missing or require immunizations and book immunization appointments. If your child was immunized in another place, please provide a copy of these records to your local public health centre. For more information see: <https://www.interiorhealth.ca/YourHealth/ChildrenYouth/Pages/Immunization.aspx> or <https://immunizebc.ca/>

Medical Alerts (serious medical conditions)

Let the school know if your child has a serious medical issue like anaphylaxis, allergies, seizures, diabetes or a heart condition. The school may have forms that need to be signed by your doctor. Your school Public Health Nurse is available to provide information and support in the planning of a safe environment for students with serious medical conditions.

Screening Services (vision, dental and hearing information)

Vision problems can affect a child's abilities, success, and confidence at school. Children in Kindergarten will be screened during the school year by Interior Health Vision Screeners. More information will be sent home with your child closer to the screening dates.

Dental pain can make learning more difficult. At any time, if your child is in dental pain, you can make a referral to the Interior Health Dental Program. For contact information and more dental health information see the Interior Health website at: <http://www.interiorhealth.ca/YourHealth/SchoolHealth/Pages/Dental.aspx>

Public Health does not routinely screen school age children for hearing. If you have concerns about your child's hearing, the school Public Health Nurse can make a referral for a hearing test at the nearest Public Health hearing clinic or see the Hearing Health website: <https://www.interiorhealth.ca/YourHealth/ChildrenYouth/Pages/HearingHealth.aspx>

Special Health Care Needs

Nursing Support Services Coordinators are available to help develop care plans for students with special health needs and provide training for their school caregivers. They also provide a liaison between school, family and other health professionals. More information is found here:

<http://www.bcchildrens.ca/our-services/sunny-hill-health-centre/our-services/nursing-support>

Public Health Records and Your Privacy

Public health programs collect personal student information (e.g. name, Personal Health Number, address and birth date) to provide health services. We do this with the permission of the BC Freedom of Information and Protection of Privacy Act (FIPPA), School Act and Public Health Act. This information is treated confidentially, kept secure, and only used for the purpose described above.

For more school health information, please contact your local public health centre or visit:

<http://www.interiorhealth.ca/YourHealth/SchoolHealth/>

For additional information also see: <https://www.healthlinkbc.ca/health-feature/back-to-school>
