

## Vaccines and Immunology

---

The World Health Organization estimates that vaccines save 2-3 million lives worldwide every year! ([immunizebc.ca](http://immunizebc.ca))

### Websites and Lesson Plan Information

#### Kids Boost Immunity (KBI) website

Kids Boost Immunity is a new Canadian online learning resource about immunization, global health and more! Linked with science and social studies curriculums, students learn about important health topics while helping other kids at the same time. The more a student learns, the more vaccines they earn for children in support of UNICEF – it that simple! To get started, teacher's register at: <https://kidsboostimmunity.com/getting-started> and create teams for their class. See more about [How it Works](#) and check out the [Sample Lessons and Online Videos](#).
