

DRUG ALERT

Kamloops

DOWN contains fluorofentanyl and ketamine

Looks Like: Pink Chunks

Sold as: Down, Dope, Fentanyl

Contains: Fluorofentanyl
Ketamine

Risk: High risk of overdose
Dizziness, dissociation and confusion
Nausea, amnesia, sleepiness, nodding out for a long time
Smoking is not safer than injecting

Ketamine is a dissociative anesthetic. In higher doses, it can cause immobilization, loss of body control, dizziness and hallucinations.

The combination of fluorofentanyl and ketamine can lead to significant sedation. Overdose symptoms may last beyond administration of naloxone.

If you have a drug that looks like this, get it tested before using. Drug checking is available in Kamloops Monday to Friday from 8:30-12:00 and 1:00-4:30 at Ask Wellness- 433 Tranquille Road (back entrance)

Consider these additional tips if you are going to use drugs

- Find more drug checking locations at www.drugchecking.ca
- Be aware of risks if mixing with other drugs, including alcohol
- Use with others around or at an Overdose Prevention Site
- Start with a small amount and wait before taking more
- Space out your doses
- Carry naloxone and know how to use it
- Call 211 or visit bc211.ca to find services near you
- Get the LifeGuard App - lifeguarddh.com

Alert in effect until July 16th 2025
