

Some ingredients in vapes can be found in car exhaust, weed killer, antifreeze, floor cleaner, and batteries.

The "vapor" is actually aerosol full of toxins.

Most vapes have over 200 untested chemicals hidden by flavour.

Formaldehyde from vapes is the same chemical used to preserve dead bodies.

Vaping scars your lungs with chemical burns.

LUNG DAMAGE

Doctors have found lungs coated in oil from vaping. This is called Lipoid Pneumonia.

Each puff weakens the air sacs that keep you breathing.
