Fluency Direct – Personal Device Interior Health Windows 11 Installation Guide

This document is a step-by-step guide for providers who are already licensed and using Fluency Direct on Interior Health hospital computers and would like to install the application on their personal Windows 11 devices.

1. Download the installer ZIP file using the following link:

Click here to download the Installer.

 Extract and Run the install Package Download program - Fluency.Direct.Full.Install.Downloader.exe from your Downloads folder. If you are unable to launch from within the Chrome or MS Edge browser, use File Explorer to find and execute from the ZIP file in your Downloads folder. You will see this (or a similar) splash screen:

- 3. Select Type "Full Install Package (Local Recognition)" and Version 12.1.46.3. Click "Start Download" to download the full installer. This is the latest version tested on Interior Health computers.
- 4. Wait for Download to Complete The download for the installation file will begin and will take quite a bit of time, depending on your network connection (the download is over 4GB).
- 5. Click on 'Open Download Directory' when the download and directory update completes.

6. The Downloads folder will open. If the Download folder does not open, File Explorer -> Downloads
