Medical office assistants (MOA), unit clerks and administration assistants perform clerical duties such as obtaining medical information, booking appointments, handling inquiries, arranging referrals, greeting visitors, and supporting daily operations in medical offices and hospitals.

Medical device reprocessing technicians (MDR) clean, disinfect, assemble, inspect, test, package, sterilize, and safely store instruments used for patient care during and after surgeries. They are able to identify hundreds of types of instruments and determine how best to care for them.

Patient porters aid in transporting patients, along with their personal belongings, equipment, specimens, and supplies to and from different locations within the hospital.

Power engineers operate and maintains a power plant or any low pressure steam plant by operating, repairing and carrying out preventative maintenance on the boilers, air conditioning units, emergency power, and other related equipment of the facility in compliance with applicable codes and regulations.

Speech-language pathologists (SLP) engage in screening, assessment, intervention, coaching, and education in all areas of speech, language, and communication with wither children or adults.

Maintenance workers carry out a range of mechanical, electrical, and structural maintenance and repair tasks associated with buildings and equipment.

Medical lab assistants perform a variety of duties such as taking blood and specimen samples from patients, preparing blood and other specimens for analysis, performing routine lab tests, distributing specimens to departments and outside Labs, and performing related clerical duties.

Health care assistants (HCA) play a role in community by providing home support services to clients by assisting with activities of daily living and supporting and encouraging maximum independence. In long-term care settings they have key responsibilities in the individual care plan for each resident to meet their physical, emotional and social needs.

Relational security officers patrol buildings and grounds, utilizing computerized surveillance equipment and video monitoring systems. They enforce regulations and security procedures.

Medical imaging professionals use state-of-the-art technology in roles that include: Ultrasound, ECG Scanning, Mammography, Cardio Technology, Radiography, MRI, Nuclear Medicine and CT Scanning.
