Interior Health	77%	71%	↑

*Interior Health rate includes all acute hospitals including those not on this list.

Hand hygiene rates are based on observations of staff practicing hand hygiene before or after patient care, as seen by auditors. Comparisons between facilities are not advised as they may differ in their size, patient characteristics, and services they provide. NA indicates data not available, or insufficient number of observations to report a rate. Hand hygiene compliance rates include all health-care provider disciplines. For more information on our hand hygiene audits, please visit: <https://www.interiorhealth.ca/about-ih/quality-care#audit-results>
